# FACADE BLINDS

## MODERN DESIGN

---

A perfect combination of aesthetics and functionality. Adjustable slats allow for precise control of the amount of light in the interior. A solution designed for modern architecture and large glazing.

## CONTROL AND PROTECTION

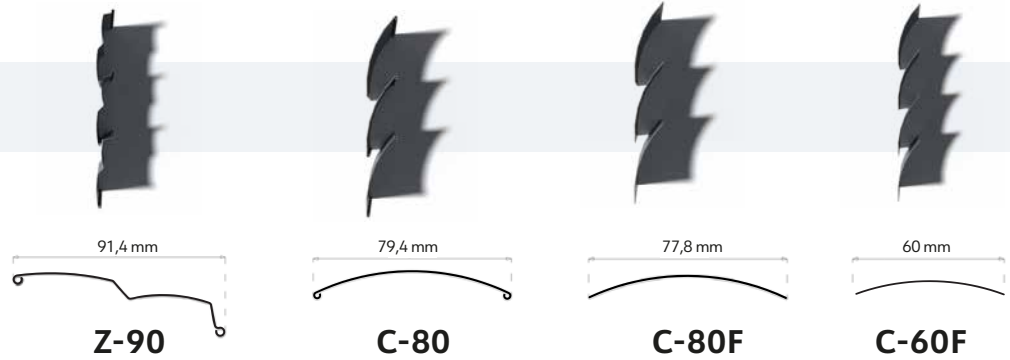

---

They effectively protect against the sun, reducing heat buildup in the summer. They provide privacy without compromising natural light. They're an investment in comfort and energy efficiency.

for easier installation  
and service

Selection of different  
guide channels

Selection of different  
depth of TenBox®  
guide channels

Quick installation of TenBox® guide channels with no visible mounting holes or plugs

# FACADE BLINDS CONTROL SYSTEM

## MANUAL CONTROL

Using a crank made of plastic, aluminum and steel elements.

## ELECTRIC CONTROL

The blinds are equipped with 230V electric drives controlled by wall switches. The drives are located in the blind's head rail. It is possible to control multiple blinds simultaneously using a single drive.

## REMOTE CONTROL

Electric drives can have built-in or additionally be equipped with external radio receivers, which allow you to control the blinds using wireless remote controls. As with electric blinds, it's possible to control multiple blinds simultaneously using a single drive.

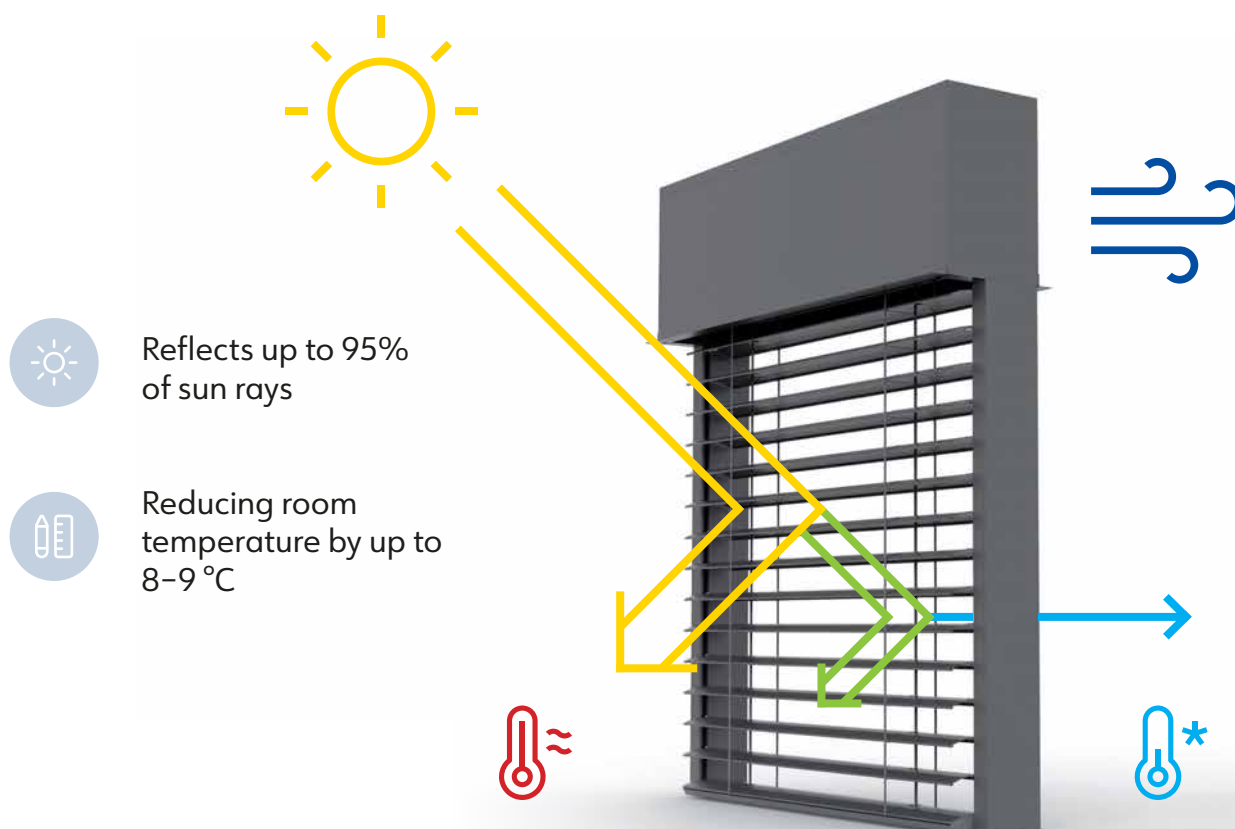

### DRIVES

Optional INEL controllers  
with Somfy and Elero drives
