ACCESSORIES FOR WINDOWS AND DOORS

GLAZING

THE PURPOSE OF THE GLAZING IS NOT ONLY TO LET LIGHT INTO THE BUILDING, BUT FIRST OF ALL TO PROTECT AGAINST HEAT LOSS AND NOISE AND BURGLARY, PROVIDING COMFORT AND SAFETY.

ORNAMENTAL GLASS

Ornaments have mainly a decorative function. The degree of transparency of the glass depends on the pattern applied, the color of the glass and any additional processing (e.g. sandblasted surface). The ornament subtly disperses the light, giving a sense of privacy.

SOLAR CONTROL GLASS

It is characterized by excellent thermal insulation, high light transmittance and low solar energy. Colorless or colored in the glass mass in blue, brown, gray and green. It can be covered with a special coating that reduces the penetration of solar radiation through the glass.
